## KEY FEATURES

- Supports up to 4K (3840 × 2160) at 30 FPS
- Ultra-Low Latency: ~1ms for real-time performance
- Robust Wireless Link: Reliable in both line-of-sight & non-line-of-sight conditions
- HDMI interfaces: Effortless integration with medical video devices
- Fully compatible with MD62, SL11, and other Falco devices
- Multicast Capability: Stream to up to 4 receivers simultaneously
- Plug-and-Play: Fast and easy setup, no configuration required
- Quick Pairing: Simple pairing via button or API integration
- Coexistence: Supports up to 6 Falco transmitters in the same Operating Room
- Secure Connection: Proprietary protocol and encrypted video link with no transfer of personalized data
