

SL11

The **SL11** system is a premium **wireless 4K video camera** designed for seamless integration into new or existing surgical lights, as well as standalone carts.

Its wireless design allows for quick and effortless installation, whether retrofitted into an existing operating room or deployed on a mobile cart—delivering exceptional video quality and reliability without the need for complex wiring.

The SL11 connects to both MD11 and MD62 wireless receivers, ensuring broad compatibility with virtually any monitor and recorder.
